

Steps to your New Home Design

Please fill in and return when completed.

To take advantage of the design opportunities that your project presents, an organization of your thoughts and expectations is important.

1. Please write a general description of the reason you want to build your home.
2. Identify the time frame that you hope to work in.
3. What is the general budget range (project costs)?
4. How many bedroom & bathrooms for the main house?
5. How many bedrooms & bathrooms for the in-law's suite?

6. What specifics do you expect in your home (i.e. skylights, materials, special function, etc.)?

7. Do you have an existing floor plan that you have come across that you would like to incorporate into your new home?

8. Describe two or three buildings, places or parts of buildings that you like, (favorite rooms, pictures from magazines, ideas you saw, etc.).
